EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Claims:

1. (Twice Amended) A collapsible chair comprising:

a chair frame comprising:

two spaced leg structures, each comprising a top bar and front and rear side bars depending from the top bar to form a substantially U-shape, the front and rear side bars connected to the top bar,

a front ground member having a U-shaped configuration comprising a bottom section adapted to be positioned on a fixture and first and second side sections extending from opposite ends of the bottom section, wherein the first side section is rotatably fit over a lower end of a first one of the front side bars of the leg structures and the second side section is removably fit over a second one of the front side bars of the leg structures,

a rear ground member having a U-shaped configuration comprising a bottom section adapted to be positioned on a fixture and first and second side

Art Unit: 3636

sections extending from opposite ends of the bottom section, wherein the first side section is rotatably fit over a lower end of a first one of the rear side bars of the leg structures and the second side section is removably fit over a second one of the rear side bars of the leg structures, and

a top ring is pivotably [fixed] affixed to the top bars of the leg structures;
and

a flexible sheet received in and attached to the top ring.

Remarks

In claim 1, Applicant attempted to correct a 112/2nd problem by amending the claim to read "a top ring is pivotably fixed to the bars of the leg structures". However, "pivotbaly fixed" reads like an oxymoron. How can the top ring be both "pivotal" and "fixed"? The word fixed suggests "securely placed or fastened: STATIONARY" or "IMMOBILE". So a structure cannot be both pivotal and fixed. It appears the Applicant intended to use the word - - affixed - -. The word "fixed" in claim 1 has been replaced with - -affixed - - which suggests "to attach physically" or "to attach in any way: ADD, APPEND".
